

CDS 2026 Poster Listing

Poster Title	Session	Poster number	Presenting Author
Unpacking spatial skills in the picture rotation task using multilevel item response theory	Poster Session 4	P4-65	Aaron Beckner
Improving metacognitive skills during a mathematics lesson	Poster Session 4	P4-9	Aaron Cecil-Xavier
Preschoolers can form enduring representations of their social network	Poster Session 4	P4-151	Aaron Chuey
Enhancing learning from number board games: Not all cues are created equal	Poster Session 3	P3-53	Aaron Dustin
Conceptualizing science as explanatory predicts elementary-school children's understanding of counterintuitive scientific ideas	Poster Session 4	P4-101	Aarti Bodas
Merging the natural and the supernatural: Developing conceptions of artificially intelligent agents	Poster Session 1	P1-111	Aarushi Gupta
Fairness or favoritism? How children interpret advantage in competitive contexts	Poster Session 3	P3-162	Aashna Poddar
Should forgiveness come easily? Children's preferences for high- versus low-effort forgiveness	Poster Session 4	P4-136	Abby McLaughlin
Evaluating spatial thinking in adolescence: Development of the Revised Spatial Thinking Ability Test (STAT-R)	Poster Session 2	P2-56	Abigail Losey
Neurocognitive outcomes of prenatal vaping exposure at 12 months	Poster Session 1	P1-12	Abigail O'Connell
Explaining everyday illness: How parents and children discuss the common cold	Poster Session 2	P2-102	Abigail Pearlman
Assessing executive function in context: Examining assessor-child identity match in early childhood	Poster Session 3	P3-28	Abigail Villa
How age of exposure affects learning a new language	Poster Session 3	P3-95	Adele Oprica
How 5 to 12-year olds respond to "each" and "every"	Poster Session 3	P3-99	Adeline O'brien

How does payment medium impact children's spending decisions	Poster Session 3	P3-68	Adine Deleon
Socio-demographic variation in preschoolers' theory of mind performance: Findings from a Canada-wide study	Poster Session 2	P2-114	Aditi Nayak
Self-regulated learning in home-insecure children: A micro-genetic study	Poster Session 4	P4-4	Aditi Tarkar
Metacognitive effects of math learning interventions with perceptual cues	Poster Session 2	P2-8	Alena Egorova
Development of the approximate number system: Accounting for the early life environment in rhesus monkeys	Poster Session 2	P2-66	Alessandra Silva
The costs of companionship: Children link burdensome help requests with friendship	Poster Session 3	P3-114	Alex Mackiel
Bilingual input in Montreal: Parental language mixing and early vocabulary development	Poster Session 3	P3-77	Alexandra Paquette
Assessing selective dimensional attention ability using the Triad Classification task	Poster Session 3	P3-22	Alexis Mccraw
Working memory in a minimally verbal individual	Poster Session 1	P1-13	Alexis Phillips
The role of labels in early working memory strategies	Poster Session 3	P3-5	Alice Aizza
Can children represent the counterfactual past and possible future on a physical visuospatial timeline?	Poster Session 1	P1-43	Alicia Jones
Monolingual children's status-based evaluations of bilingual speakers	Poster Session 1	P1-77	Alison De Leon Escobar
Three's a crowd: 2- and 3-year-olds coordinate decisions in dyads and triads	Poster Session 3	P3-76	Alissa Rivero
Does children's acquisition of number gestures mirror number words?	Poster Session 2	P2-64	Allie Tung
Connecting the dots: word-learning and semantic connectedness in 5-yr-olds	Poster Session 1	P1-71	Allison Granger
"You can't answer that precisely!": Children and parents' justifications for preferences towards a virtuously ignorant smart speaker	Poster Session 2	P2-48	Allison Williams-Gant
Comparing social and physical reasoning abilities in infants and a large language model	Poster Session 1	P1-107	Alyson Wong

Counting the cost: Children integrate quantity into their evaluations of ownership violations	Poster Session 3	P3-124	Alyssa Doerksen
Keeping track of time: Does formal education of temporal symbols refine children's ability to perceive time?	Poster Session 1	P1-62	Alyssa Smith
"Science experiments are hard work!": An analysis of mental state language in children's science narrative books	Poster Session 4	P4-141	Amanda Haber
From conversations to classrooms: Inhibitory control mediates associations between maternal reminiscing style and school readiness	Poster Session 3	P3-12	Amanda Whitehead-Buchanan
Teachers' use of questions in dual-language elementary school classrooms: Associations with academic performance	Poster Session 1	P1-31	Amber Westover
Older but not younger children distinguish between ability and proximity-based close counterfactuals	Poster Session 2	P2-45	Amy Howard
Who do toddlers imitate? Effects of race and exposure to diversity	Poster Session 3	P3-147	Amy Miyahara
Do unto others: Theory of mind, religion, and prosocial-humanistic practices in emerging adults	Poster Session 3	P3-120	Amy Weimer
Talk the talk: Effects of language background on linguistic alignment	Poster Session 2	P2-86	Ana Ljujic
Exploring sibling musical play with a silent disco paradigm	Poster Session 1	P1-159	Ana Luiza Miranda Guimaraes
When math histories matter: Rethinking caregivers as early math socializers	Poster Session 1	P1-60	Ana Ramirez-Rojas
It's in the family: The development of racial group knowledge within Multiracial families	Poster Session 3	P3-160	Analia Albuja
Latine families' everyday science practices and activities with their preschool-aged children	Poster Session 3	P3-94	Andrea Bühler-Wassmann
Does perceptual richness of life cycle diagram backgrounds influence children's learning about metamorphosis?	Poster Session 1	P1-108	Andrea Marquardt Donovan
Both electronic and paper-based number line tasks show strong left digit bias in children and adults	Poster Session 1	P1-58	Andrea Patalano
Labels do not help - and may hinder - children's emotion category learning	Poster Session 4	P4-105	Andrea Stein

Numerical tracking and resource sharing: Children's representation of others' knowledge state in optimizing their gains	Poster Session 4	P4-64	Andrena Nguyen
Enhancing children's cognitive reflection: Effects of reflection prompts and social context	Poster Session 3	P3-29	Andrew Young
Latine caregivers' oral stories with their preschoolers supporting science learning and identity	Poster Session 2	P2-85	Anele Villanueva
The role of language engagement in bilingual children's religious faith development	Poster Session 2	P2-75	Angel Tang
Shared positive affect demonstrations during parent-infant musical interaction	Poster Session 1	P1-92	Angela Dou
Children sample adaptively but rarely explore when learning novel word extensions	Poster Session 1	P1-100	Angela Liu
Thinking ahead: The development of mental simulation as a problem-solving strategy	Poster Session 3	P3-27	Angela Nyhout
Executive function growth in preschool and montessori environment quality	Poster Session 4	P4-16	Angeline Lillard
25 years of developmental psychology: A bibliometric analysis of the field	Poster Session 4	P4-7	Anke Weber
Differences in holistic face processing between typically developing children and children with autism spectrum disorder	Poster Session 3	P3-19	Anna Pusok
The pull of social allegiance: An investigation of young children's in-group biases	Poster Session 1	P1-114	Anna Baumann
When parents talk politics (or don't): Parent-child political talk and its relation to U.S. children's political development	Poster Session 2	P2-166	Annie Schwartzstein
What errors reveal about cognition: Diagnosing erroneous learning processes in intensive longitudinal practice data	Poster Session 4	P4-61	Annie Johansson
Thematic analysis of parent-child conversations about gender nonconformity	Poster Session 2	P2-154	Annie Riggs
"You're Right!" children's preferences and trust in sycophantic vs truthful social partners	Poster Session 1	P1-165	Annya Dahmani

Anthropomorphic concepts of an invisible entity: Evidence from a six-wave longitudinal study of early and middle childhood	Poster Session 3	P3-107	Anondah Saide
Beyond quantity: Do children use subjective value to infer social preferences?	Poster Session 3	P3-131	Antonella Franciolapilla
Question-asking during parent-child play with familiar and unfamiliar objects	Poster Session 2	P2-92	Anyssia Gomez
Relationships among early word segmentation, later vocabulary development, and maternal infant-directed speech (IDS) in Korean infants	Poster Session 4	P4-99	Aran Kim
How play-based learning develops children's mathematical understanding: A systematic review	Poster Session 3	P3-65	Arielle Orsini
When adolescents and emerging adults think reasonable people can disagree about morality and politics	Poster Session 1	P1-123	Arvid Samuelson
Shifting dynamics of caregiver-infant multimodal object play across the first year	Poster Session 1	P1-14	Ashley Dautrich
Do children leverage relationships among meanings of novel polysemous words?	Poster Session 3	P3-79	Ashley Reece
Parent-child conversations about disability and other human traits	Poster Session 2	P2-110	Audrey Yu
When someone's watching: Experimenter presence and children's executive function	Poster Session 4	P4-5	Aurelien Frick
Exploring the visual characteristics of relational actions in toy play	Poster Session 3	P3-14	Ava Mulis
Size and racial diversity of children's social networks as predictors of their Theory of Mind	Poster Session 3	P3-119	Ava Rooney
The relationship between text complexity and executive functions: Text complexity facilitates working memory	Poster Session 3	P3-18	Avery Branam
Parents consistently underestimate their children's prejudices	Poster Session 3	P3-153	Aviva Barry
Looking behind vs. front to follow points: A link between maternal pointing and infant vocabulary development	Poster Session 3	P3-71	Aylin Küntay
Beyond sameness: Children use similarity to infer friendship	Poster Session 2	P2-163	Ayshe Ozlu
The role of domain expertise in children's question asking	Poster Session 3	P3-75	Bailey Pemberton

“What else do you know?”: Inferring knowledge structure from sparse observation	Poster Session 4	P4-134	Ben Morris
A card game to counter essentialist conceptions of animal lifecycles	Poster Session 1	P1-106	Benjamin Jee
On the same wavelength: EEG connectivity linking executive function and mathematics across development	Poster Session 1	P1-27	Bethan Grimes
Some things are better left behind: Adolescent transmission of conflict narratives in a divided society	Poster Session 4	P4-121	Bethany Corbett
Infants with larger social networks show reduced social fear of strangers	Poster Session 3	P3-122	Bethany Ou
When do human infants and pet dogs expect contact in transport events? The role of animacy in causal expectations	Poster Session 3	P3-6	Beyza Gokcen Ciftci
Children make rapid inferences about others’ future behavior from decisions about costly helping	Poster Session 2	P2-120	Bill Pepe
“I didn’t know cooking was science!” Experiential science camps increase situational interest, increase STEM identity, and broaden definitions of STEM	Poster Session 3	P3-101	Bradley Morris
How children evaluate task-unrelated thoughts in rituals and routines: Efficacy, appropriateness, and executive function	Poster Session 4	P4-6	Brandi McDonald
Infants track the social targets of their parents’ gaze	Poster Session 2	P2-155	Brandon Woo
Childhood creative experiences and conspiracy beliefs	Poster Session 1	P1-44	Bri Jordan
Just enough or too much? Dynamic patterns of caregiver support in parent–child problem solving	Poster Session 4	P4-97	Brianna Mcmillan
Selective trust in autistic and typically developing children	Poster Session 2	P2-139	Brittney Abundis
What do pediatric care providers know about cognitive development? Implications for early numeracy	Poster Session 2	P2-68	Brooke Azzinnaro
Direct competition shapes the development of infants’ attention orienting biases to faces based on species-, but not race-based information	Poster Session 1	P1-17	Brooke Montgomery
Loneliness, phone use and gender predict adolescents’ attribution of social intentions	Poster Session 1	P1-8	Bruce Homer
Children’s question-asking before and after the 2024 U.S. presidential election	Poster Session 4	P4-167	Bryanna Boone

Can children learn functional relations through active informative sampling?	Poster Session 3	P3-110	Caiqin Zhou
Cheating is one decision, lying is another: Cognitive correlates of cheating and lying across two tasks	Poster Session 2	P2-130	Calahndra Brake
Depression and gender identity: Unique predictors of latent measures of autobiographical memory phenomenology in transgender and cisgender adults	Poster Session 2	P2-37	Caleb Schlaupitz
How does elementary school children's math and spatial intrinsic motivation influence their performance on a number-line math task	Poster Session 4	P4-146	Caleb Soong
How children's gender expression and race influence adults' mental state language	Poster Session 2	P2-152	Callyn Farrell
Timing fairness: How decision speed shapes children's fairness choices	Poster Session 3	P3-126	Camile Bernard
Does guided support improve four-year-old's numeracy knowledge?: Evidence from a number board game intervention	Poster Session 4	P4-68	Camille Msall
How does classroom peers' math anxiety relate to elementary students' math learning and does children's initial math achievement and anxiety moderate this relation?	Poster Session 1	P1-59	Can Çarkoğlu
"Is Santa really real?": How parents answer challenging questions about Santa	Poster Session 2	P2-44	Candice Mills
Investigating the approximate number system: Non-symbolic addition and rational number representation in 5- to 7-year-olds	Poster Session 4	P4-56	Candice Rubie
Spontaneous attention towards faces of different races in adults and infants	Poster Session 1	P1-18	Carie Guan
Parental perspective: The role of parental digital media belief in children's media beliefs, memory, and transfer learning of educational content	Poster Session 2	P2-35	Carla Macias
Could a White parent have a Black baby? Early reasoning about possibility in the social domain	Poster Session 4	P4-155	Carmen Haley
The role of rotational angle and agency in young children's level 2 perspective-taking skills	Poster Session 2	P2-50	Carol Lu

Associations between left digit bias in children’s number line placements and math/verbal abilities	Poster Session 4	P4-63	Caroline Hornburg
The impact of adult feedback on children’s vocabulary learning during shared book reading	Poster Session 2	P2-76	Cassandra Bull
Young children assign collaborators an “easy win” after a frustrating loss	Poster Session 1	P1-129	Chantal Valdivia-Moreno
Using number lines and analogies to support integrated rational number sense: A digital rational number intervention	Poster Session 3	P3-66	Charles Fitzsimmons
Chinese word learning and motivation through multimodal input	Poster Session 2	P2-91	Ching-I Huang
I’m not being critical, but others might be: U.S. children predict their peers will tell fewer prosocial lies than they tell themselves	Poster Session 4	P4-137	Chloe Downey
Saving a choice for a peer: The development of subtle considerate behavior in children	Poster Session 1	P1-131	Christel Klootwijk
Attachment security and curiosity in infancy and early childhood	Poster Session 2	P2-124	Christina Stewart
Collective cognitive resources: the role of collaboration in worked example learning	Poster Session 1	P1-153	Christina Barbieri
Theory of Mind as a universal foundation for scientific reasoning: Evidence from Japan and Germany	Poster Session 2	P2-103	Christopher Osterhaus
Talking about animals: How parent expertise and pet ownership shape children’s biology knowledge	Poster Session 2	P2-46	Christy Thomas
The interactive effects of patterning and place value knowledge on arithmetic achievement	Poster Session 2	P2-55	Chunxu Zong
Building the syntax of numbers: How children develop place value understanding	Poster Session 3	P3-58	Chuyan Qu
Does collaboration promote perspective-taking in preschoolers?	Poster Session 3	P3-9	Claire Heyne
Developing a social food questionnaire for infants	Poster Session 2	P2-141	Claire Hughes
Which words when: Predicting vocabulary acquisition in children born preterm	Poster Session 4	P4-25	Clara Merkel
Metacognitive guidance in the home environment: Links to children’s monitoring sensitivity and efficiency	Poster Session 2	P2-7	Claudia Roebbers

The relation between spatial language exposure and mental rotation skills in toddlers	Poster Session 2	P2-57	Claudia Wimsatt
Parent reports of naturalistic help-seeking in the home	Poster Session 4	P4-143	Cole Dougherty
Standardizing measures of hot executive function: Individual differences in children's response to a countdown timer	Poster Session 2	P2-20	Colin Drexler
Children consider epistemic access and expertise when evaluating testimonial injustice	Poster Session 1	P1-126	Colin Jacobs
Cool but cruel? Children infer coolness and prosociality from descriptions of their peers	Poster Session 4	P4-162	Cory Jordan
Investigating infants' abilities to formulate overhypotheses to social groups	Poster Session 1	P1-161	Cristina Sarmiento
Parental linguistic scope matters in children's gender essentialism beyond children's explicit verbal agreement	Poster Session 2	P2-83	Cynthia Boo
The effect of linguistic cues on children's reactions to discrimination	Poster Session 1	P1-158	Cynthia Rujia Jiao
How young children learn common nouns and brand names for artifacts: The potential contribution of caregiver speech	Poster Session 2	P2-78	D. Geoffrey Hall
Examining the role of classroom tools in supporting kindergarteners' working memory	Poster Session 3	P3-33	Dana Miller-Cotto
How you play the game matters for learning: math anxiety influences how females play an open-ended digital math game	Poster Session 2	P2-61	Dania Carr
Choosing friends: How children weigh gender and gender expression in their peer preferences	Poster Session 1	P1-162	Daniela Galvez-Cepeda
Mirror, mirror: early use of mirror strategies in digital play relate to 3D spatial skill in preschoolers	Poster Session 4	P4-13	Danielle Rothschild Doyle
Young children's responses to self-effacing versus self-promoting behaviors: Does gender matter?	Poster Session 3	P3-165	Danuta Bukatko
Growth mindset beliefs/behaviors and student academic stress: The role of student perceptions of academic advisors	Poster Session 3	P3-164	Darby Matusz
Measuring implicit attitudes in preschool children using new online, unmoderated tools	Poster Session 4	P4-152	Dario Cvencek
Longitudinal relations between theory of mind and scientific reasoning from ages 4 to 7	Poster Session 1	P1-42	David Sobel

Aligning developmental sensitivity between context and historical time	Poster Session 1	P1-109	David Tompkins
Influence of cost on children's instrumental helping and prosocial lying	Poster Session 1	P1-119	Deborah Shewchuk
Dreams defy constraints: How aspirations shape children's perceptions of future possibilities for themselves and others	Poster Session 1	P1-40	Declan Gunn
Manual exploration of familiar and unfamiliar objects during parent-child play at home	Poster Session 4	P4-33	Delaney Witmer
Behavioural and neural signatures of cognitive flexibility from toddlerhood to preschool	Poster Session 3	P3-23	Delaram Bagheri Rad
Can caregiver affiliations influence language bias in children?	Poster Session 3	P3-168	Denisse López Flores
Is this appropriate? Parent attitudes towards children's death-themed picture books	Poster Session 3	P3-103	Devyn Larue
How pedagogy and visual expectations jointly shape children's downstream event processing	Poster Session 4	P4-103	Diana Daschel
Pilot intervention promoting preschoolers' language and literacy through food routines	Poster Session 4	P4-80	Diana Leyva
Accuracy over animacy: Children's trust in human and robotic informants	Poster Session 2	P2-162	Diane Poulin Dubois
Two languages, two taps: Investigating English-Spanish bilingual language development with a new web-based vocabulary assessment	Poster Session 3	P3-85	Diego Leon
Screen time moderates age-related improvements in executive attention across childhood	Poster Session 3	P3-36	Dilara Kessafoglu
Epistemic characteristics of mother's testimony relate to reductions in White children's racial biases over time	Poster Session 1	P1-95	Diqi Zeng
Children's backward counterfactual logic	Poster Session 4	P4-48	Dominic Le
Scientific explanations in children's narrative science books	Poster Session 2	P2-96	Dorentina Dedushaj
Explicit and implicit language cues to social exclusion: The role of intonation	Poster Session 4	P4-93	Douglas Behrend
How do children evaluate different political systems?	Poster Session 4	P4-161	Duygu Yilmaz
"Ice cream or cake?" Free choice inferences and compatible possibilities	Poster Session 3	P3-49	Ebru Evcen

A valence asymmetry in human newborns' responses to distinct prosocial and antisocial events	Poster Session 1	P1-136	Eddie Kim
Children's judgments of recommendation seeking behaviour	Poster Session 3	P3-4	Ekam Banipal
Enriching educators' math talk and children's numeracy skills in early childhood education	Poster Session 2	P2-80	Elaine Reese
Overparenting leads peers to form negative self-beliefs	Poster Session 3	P3-141	Elaine Wang
Does God help others? Children's personal connection to God in relation to prayer rituals and God's reality status	Poster Session 4	P4-120	Elena Guerrero Galaz
Predicting individual differences in the frequency of French-English bilingual children's code-switching	Poster Session 1	P1-75	Elena Nicoladis
Shaking boxes: When can children infer epistemic goals from actions?	Poster Session 3	P3-8	Elif Poyraz
The impact of individual- and group-level peer behavior on children's word learning	Poster Session 4	P4-73	Elise Breitfeld
Children and parents make inferences about challenge-situated learning that flexibly consider availability of help and task difficulty	Poster Session 4	P4-139	Elise Mahaffey
Families' social norms and explanations about responsible technology use	Poster Session 2	P2-125	Elisha (Seoyoon) Bae
Which children learn from gesturing? Modeling the relative strength of individual difference predictors	Poster Session 3	P3-93	Eliza Congdon
Mine, yours, ours: Examining children's use of ownership transgressions in relationship inferences	Poster Session 1	P1-166	Eliza Mocanu
Motivating proactive control in children: The impact of explicit vs. Implicit instruction	Poster Session 1	P1-23	Elizabeth Boor
Do costly signaling opportunities affect children's third-party punishment decisions?	Poster Session 3	P3-115	Elizabeth Bracht
Do theory of mind tasks overestimate children's anthropomorphism of non-human agents?	Poster Session 1	P1-112	Elizabeth Goldman
Contributions of theory of mind to children's recognition of linguistic registers	Poster Session 1	P1-82	Elizabeth Kolln
Gestures can be representational, but do young learners know that? Exploring how children interpret instruction containing gesture	Poster Session 1	P1-73	Elizabeth Wakefield

Objects and sortals in children's number reasoning.	Poster Session 3	P3-50	Eloise West
The effect of source claims on children's judgments of speaker accountability	Poster Session 4	P4-115	Emily Chau
Children intuitively reason about novel algorithms	Poster Session 4	P4-60	Emily Sanford
Allocation of visual attention among deaf children in interactive play and independent sign recognition	Poster Session 3	P3-30	Emily Saunders
A mess worth making? How effort influences children's obligation judgments	Poster Session 2	P2-121	Emily Stonehouse
Exploiting objects to explore relations: A graph theoretic account of how toddlers build knowledge during play	Poster Session 1	P1-38	Emily Yearling
Investigating connections between language at 2 and emotion regulation at 8 in a longitudinal cohort study	Poster Session 3	P3-91	Emma Amyot
Promoting phonological awareness to parents and children in a museum setting	Poster Session 2	P2-74	Emma Bartley
Longitudinal predictors of receptive and expressive language in toddlers: A closer look at parent responsiveness and parent psychological distress	Poster Session 2	P2-89	Emma Blakey
Developing predictions: Predictive processing of disfluent speech in monolinguals and bilinguals	Poster Session 4	P4-17	Emma Libersky
Investigating the association between maternal adverse childhood experiences and infants' heart rate-defined sustained attention during free play	Poster Session 4	P4-19	Emma Meyer
Children expect emotional consolation to occur in close relationships	Poster Session 2	P2-148	Emma Yu
The role of word-meaning assumptions in the learning of brand names by children and adults	Poster Session 4	P4-102	Erica Dharmawan
Listen to the beat, baby: Exploring the role of rhythmic regularity in early word learning	Poster Session 4	P4-96	Erica Flaten
Measuring students' trust in their teachers: A community-based participatory research (CBPR) study	Poster Session 2	P2-145	Erika Deangelis
From gestures to memory: How pointing and tapping guide infants' attention and learning	Poster Session 2	P2-17	Erim Kizildere
Children's evaluations of listeners from speakers' explanations	Poster Session 3	P3-90	Erin Kim

Verbal comprehension alters the link between autism severity and theory-of-mind performance	Poster Session 2	P2-90	Esin Gürcan
Quantifying the diversity of early social and language environments	Poster Session 3	P3-72	Esmee Aalders
Preschool classroom support for transition from event-dependent to event-independent time understanding	Poster Session 4	P4-47	Estelle Mayhew
Children's attitudes and behaviours towards different language varieties in health care settings	Poster Session 1	P1-148	Ethne James
Gendered speech perception in childhood: Adults distinguish boys' and girls' voices before puberty	Poster Session 2	P2-38	Evan Carlson
Mechanisms linking spatial skills and early mathematics: Number line representation and spatial language	Poster Session 3	P3-57	Eylül Turan
Children's developing ability to infer true preferences based on disagreement	Poster Session 3	P3-123	F. Ece Özkan
Empowerment-driven exploration in human causal learning across development	Poster Session 2	P2-26	Fei Dai
Investigating cognitive mechanisms underlying moral expansiveness in childhood	Poster Session 3	P3-135	Fiametta Boffey
Children's concerns about climate-related harm: Effects of victim identity	Poster Session 4	P4-125	Fiona Debernardi
Epistemic injustice lowers Kenyan and Swiss children's confidence	Poster Session 4	P4-150	Florian Buehler
Children's theory of mind for ingroup versus outgroup others	Poster Session 1	P1-134	Francis Yuen
Um...emulate or overimitate? Children use fillers to decide when to parse or copy repeated syllables in nonsense words	Poster Session 1	P1-5	Francys Subiaul
What children think parents feel about math matters for math anxiety	Poster Session 1	P1-145	Fraulein Retanal
Attention in the digital classroom: How instructional modifications influence adults' attention during lecture	Poster Session 2	P2-3	Freya Kaur
The impact of social vs. digital feedback in metacognition training for kindergarteners	Poster Session 4	P4-12	Fritz Johanna
Children's epistemic trust in voice assistants as shaped by different types of errors	Poster Session 2	P2-5	Fuxing Wang

Would you trust a robot that makes errors? The impact of robot errors on children's trust	Poster Session 4	P4-114	Fuxing Wang
Spontaneous perception of visuospatial ensembles in children and adults	Poster Session 3	P3-2	Gabriel Waterhouse
“Right... or her family has money,” Is parent-talk about social class predictive of children’s social-class attitudes?	Poster Session 1	P1-156	Gabriel Nguyentran
A context for translanguaging: Latine parent and child language use during a science book-reading activity	Poster Session 1	P1-84	Gabriela Sierra
First- and later-born infant joint attention and language development	Poster Session 1	P1-80	Gabriella Filipski
Children's developing decisions about fairness and effort in generating praise.	Poster Session 2	P2-140	Gabriella Modesti
Evidence of induction by overhypothesis among indigenous Amazonian children and adults	Poster Session 2	P2-59	Gabriella Morales
Handwriting fluency as an integrative skill linking sensorimotor skills and reading in school-aged children with varying ADHD symptoms	Poster Session 4	P4-21	Gabrielle Shimko
Mechanisms of support: Why parent-preschooler dialogic reading promotes learning	Poster Session 3	P3-84	Gabrielle Strouse
From recruitment to experience: Caregivers’ motivations, beliefs, and concerns regarding developmental research	Poster Session 2	P2-12	Gargi Kanugo
Beyond the guessing game: Science talk within latine caregiver-child adivananzas sharing	Poster Session 1	P1-105	Gigliana Melzi
Capturing dynamic variation in bilingual children’s language input using Ecological Momentary Assessment	Poster Session 3	P3-80	Giselle Yao
Examining links between spatial reasoning and arithmetic skills in low-income children	Poster Session 1	P1-6	Giulia Borriello
Agreement between researchers and parents in recording children’s pointing in forced-choice word-learning tasks	Poster Session 1	P1-87	Goldie Segol
Making sense of a warming ocean: How STEM-related talk and gesture combine to support students’ understanding of climate data	Poster Session 2	P2-106	Grace Ocular
Hume's principle acquisition in macaques and children	Poster Session 1	P1-66	Gracie Zeller

Curious minds on the rise: Parental perspectives on children's questions	Poster Session 1	P1-76	Graciela Trujillo
What you say and how you say it: Relations between language and attention in a prospective study cohort	Poster Session 1	P1-96	Hadley Perkins
Children, but not chimpanzees, seek information strategically	Poster Session 2	P2-24	Hanna Schleihauf
Examining 2-year-olds' cardinality understanding	Poster Session 1	P1-10	Hanna Weiers
How physiological arousal may predict children's adherence to costly normative rules	Poster Session 4	P4-35	Hannah Auddino
Written in stone: Children and adults' inferences about where there are formal rules	Poster Session 1	P1-132	Hannah Kim
Children's and adult's beliefs about the possibility of conflicting mental states	Poster Session 4	P4-128	Hannah Kramer
'I won!': A playful way for children and adults to learn about biological concepts	Poster Session 1	P1-103	Hannah Zavalkoff
Children's integration of visual concepts via line drawings of hybrid categories	Poster Session 4	P4-20	Haoyu Du
The role of self-efficacy in children's experience and understanding of the placebo effect	Poster Session 3	P3-106	Harsha Ketavarapu
Parental early adversity and the possible protective factor of sleep on communication in 2-year-olds	Poster Session 4	P4-24	Hatty Lara
"I miss the support from people who 'get it' ": Multilingual and monolingual parents' perceptions of multi-language learning resources in their community	Poster Session 2	P2-149	Helen Fann
Do six-month-olds use vowel harmony to segment speech?	Poster Session 3	P3-3	Helen Shiyang Lu
Measuring internal and external curiosity: Links between self-reported curiosity and curious behavior in science learning	Poster Session 4	P4-109	Helena Goldbaum
Unpacking second graders' knowledge of the multiplicative relations among base-ten units	Poster Session 3	P3-64	Helena Osana
Adapting to gravity: The role of embodied experience in physical reasoning in children and adults	Poster Session 3	P3-100	Helene Grandchamp Des Raux
Children's multiple conceptions of death: Biological, spiritual, and affective understandings	Poster Session 3	P3-109	Henrique Santos
Who uses the tool? Social roles shape functional fixedness in children	Poster Session 1	P1-149	Herrissa Lamothe

Racial biases in young children's sympathy, empathy, and expectations for peers' empathy	Poster Session 4	P4-133	Heston Blackwell
Social inferences from special days	Poster Session 4	P4-158	Hilary Barth
Individual differences in young children's flexible attention to magnitudes	Poster Session 1	P1-50	Hyekyung Park
Does the race of the stranger matter? Investigating toddlers' wariness towards racial ingroup versus outgroup strangers	Poster Session 2	P2-159	Ian Ferrucci
Providing labels for complicated feelings: Can word labels help 3- to 5-year-olds better conceptualize mixed emotions?	Poster Session 2	P2-99	Idella Smolyar
Inhibition in individuals with Williams syndrome and neurotypical children	Poster Session 1	P1-2	Imogen Van Jaarsveldt
The role of internal and external motivations in children's counterfactual reasoning about psychological scenarios	Poster Session 3	P3-40	Ioana Grosu
Caregiver customs and communication with children in Eastern Kentucky Appalachia	Poster Session 2	P2-81	Iris Jeffries
Associations among executive functions, self-regulation, chronic stress, and math learning outcomes across early and middle childhood	Poster Session 2	P2-10	Isabel Valdivia
When taking blame pays off: Children's evaluations of selflessly taking responsibility	Poster Session 2	P2-127	Isabella Ramkissoon
Executive function as a concurrent and longitudinal predictor of STEM motivation in elementary students	Poster Session 4	P4-36	Isabella Viducich
How do children feel when interacting with peers of marginalized ethnic groups?	Poster Session 1	P1-164	Isabelle Guicherit
Bilingual language mixing strategies in early childhood	Poster Session 2	P2-95	Ishaan Ambrish
Expectations and working memory in adults as a function of birth mode: An eye movement study	Poster Session 3	P3-26	Ivy Chau
Children's developing understanding of prospective self-control	Poster Session 3	P3-169	Jacob Dominic Wilson
The role of temperamental inhibition and inhibitory control in children's selective trust	Poster Session 4	P4-77	Jacqueline Tiros-Lezama
The development of spontaneous episodic future thinking for a multi-step plan in middle childhood	Poster Session 3	P3-44	Jade Zack

The effect of teacher uncertainty on children’s perceptions of knowledge and learning potential	Poster Session 1	P1-141	Jadee Do
The effect of attention on the relationship between socioeconomic status and memory	Poster Session 2	P2-30	Jaden Kropf
When help comes from a woman: How task and helper gender shape inferences about problem-solving in children and adults	Poster Session 3	P3-150	Jaemin Hwang
The portrayal of female characters in children's stories can reinforce gender role stereotypes	Poster Session 3	P3-81	Jamie Gahtan
Learning verbs directly and by overhearing in Uganda and the US	Poster Session 4	P4-71	Jane Childers
How the home math environment relates to preschoolers' understanding of number order	Poster Session 3	P3-69	Janessa Madison
Four-year-olds’ use of generic knowledge as shared knowledge	Poster Session 3	P3-88	Jared Vasil
Is that an animal or a dog? Differences in rapid visual categorization in children and adults	Poster Session 2	P2-100	Jeff Loucks
Labels are not enough: Same-kind bias for number words depends on causal distinctions	Poster Session 4	P4-50	Jenna Croteau
Dual-label cross situational word learning in the context of early language experience and cognitive development	Poster Session 1	P1-70	Jenna Distefano
Imagined constraints on human action across cultures and development	Poster Session 1	P1-139	Jenny Nissel
Imagined constraints on human action across cultures and development	Poster Session 4	P4-111	Jenny Nissel
Tracking infant facial expressions in real-time with iPhone TrueDepth cameras	Poster Session 4	P4-75	Jesse Pazdera
Batman strikes again: An experimental examination of the relation between executive function and peer conflict resolution	Poster Session 2	P2-32	Jessica Caporaso
Playing the odds: When plausibility shapes deception in children	Poster Session 2	P2-40	Jessica Crimston
Don’t stop retrieving: Walking experience facilitates object interception	Poster Session 3	P3-32	Jessica Ye
“What’s important for my child?”: Parents’ views on child socialization goals across cultures	Poster Session 1	P1-144	Jiayue Sun

Measuring early scientific interest: Insights from two empirical studies	Poster Session 3	P3-137	Jihye Bae
When do pre-sleep gestures matter: Temperamental differences and interactional contexts in early communication development	Poster Session 4	P4-83	Jihyeong Seo
Understanding children's gossip from daily talk using an LLM-assisted framework	Poster Session 4	P4-159	Jincheng Wu
Examining interrelations among temperament, media use, and behavioral problems in early childhood	Poster Session 1	P1-25	Jing Chen
Assessing toddlers' puzzle-solving performance using Bayesian item response models	Poster Session 4	P4-62	Jing Xu
Children's revision of ontological beliefs about unobservable entities across and within cultures	Poster Session 4	P4-43	Jingyi Xu
Family dynamics and executive function: Pathways to externalizing, internalizing, and attention problems in youth	Poster Session 2	P2-18	Jinyi Zhang
The role of dosage and prior knowledge in improving children's mathematical skills through a board-game intervention	Poster Session 2	P2-54	Jiwon Ban
Word learning across domains: Preschoolers' selective use of child and adult informants	Poster Session 2	P2-79	Jiya Gupta
Emotional influences of the developing ability to recall time and order in episodic memory	Poster Session 4	P4-27	John Arruda
The development of intuitive cooperation across eight societies	Poster Session 2	P2-131	John Corbit
Gesture supports learners with poor encoding and undifferentiated strategy knowledge	Poster Session 3	P3-54	John Zbaracki
Children and adolescents' evaluations of wealth-based competence assumptions in academic contexts	Poster Session 2	P2-161	Jonah Brenner
Parental support for reminiscing is person- and situation-specific	Poster Session 4	P4-10	Jordan Denaver
The development and consequences of racialized essentialist beliefs about national identity in American children	Poster Session 1	P1-151	Jordan Legaspi
The associations between child language brokering (frequency and subjective feelings) and executive functioning skills	Poster Session 4	P4-79	Jordan Perry

Exploring how parents and toddlers navigate media challenges	Poster Session 4	P4-90	Jordi Sterett
Variability in vividness of visual imagery in children and its relation to visuospatial cognition	Poster Session 2	P2-42	Julia McClellan
Novel group behaviors: Children's generalizations to an unlabeled social category	Poster Session 2	P2-129	Julia Wefferling
Experience with multidimensional thinking can improve five-year-olds' performance on the advanced DCCS	Poster Session 3	P3-34	Julie Olsen
Big words, small learners: How children learn adjectives from context in dialectally diverse environments	Poster Session 4	P4-89	Julie Schneider
Familiarity or expertise? Monolingual and bilingual children's evaluation of languages and of their speakers	Poster Session 4	P4-85	Kaitline Fournier
Visual experience influences preschoolers' visual attention to congruent and incongruent objects in naturalistic scenes	Poster Session 1	P1-35	Kaitlyn Wong
Executive function and theory of mind cause children to cheat less: A causal machine learning approach	Poster Session 4	P4-44	Kang Lee
Caregivers' estimates reflect but systematically exceed their children's actual number knowledge	Poster Session 1	P1-63	Kara Weisman
When expectations differ: The role of controllability and identity relevance in shaping expectation reasoning in children and adults	Poster Session 1	P1-28	Karen Lara
Causality over elaboration: Childhood standards for explanatory quality	Poster Session 1	P1-101	Karima Elgamal
Age-related trends in home timing activities: A comparison with literacy and numeracy practices	Poster Session 2	P2-67	Karina Hamamouche
Using pupillometry to assess cognitive effort in children's mental rotation tasks	Poster Session 2	P2-6	Karina Rodriguez
Happy homework helping: Understanding Latinx parent behaviors during mathematics homework	Poster Session 1	P1-97	Karla Mercedes
Take 5! Benefits of classroom-based breaks on children's attention and memory consolidation	Poster Session 3	P3-7	Karrie Godwin
Learning through play: The role of success and failure in infant relational actions	Poster Session 1	P1-37	Kate McMahon
Attending together, while apart: Joint visual attention in grandparent-grandchild video chats	Poster Session 3	P3-31	Katherine Crotty

Does reaching reveal conflict in children's fairness decision-making?	Poster Session 2	P2-133	Katherine McAuliffe
House systems as contexts for child cognitive development in elementary school: An observational study	Poster Session 1	P1-146	Katherine Tanaka
Parents' and children's explanations of intergroup conflict across cultures	Poster Session 3	P3-161	Kathleen Corriveau
14- to 18-month-old infants' counting recognition relies on one-to-one correspondence	Poster Session 4	P4-54	Kathleen Cracknell
Investigating play, math skills, and executive functioning in kindergarten and first grade students	Poster Session 2	P2-22	Kathleen Kannass
The role of body shape in children's categorization judgements	Poster Session 3	P3-157	Kathryn Brook
Early U.S.-China differences in math ability: The role of parental math support	Poster Session 3	P3-51	Kathryn Krasnoff
The impact of individual differences and context on learning from gesture	Poster Session 1	P1-79	Katie Mathias
How the emergence of lexical signs for spatial relations shapes spatial categories in learners of an emerging sign language in Nicaragua	Poster Session 3	P3-67	Kaurvaki Bajpai
Analyzing the associations between infant temperament, eye movement control and sustained attention as measures of endogenous attention development across 4-, 6- and 8-months of age	Poster Session 1	P1-32	Kayla Brown
Do children prioritize utility or attractiveness in a gift exchange?	Poster Session 3	P3-128	Kayley Dotson
The bridge is out: The role of Graphophonological-semantic cognitive flexibility in 4th grade prosody and reading comprehension	Poster Session 3	P3-24	Kelly Cartwright
Children's motivation and accuracy in taking others' perspectives are positively related	Poster Session 2	P2-116	Kennedi Bouchee
Monolingual and multilingual children's word learning from consistent vs. variable labels	Poster Session 2	P2-82	Kennedy Casey
Using cultural symbols for math learning: Integrating Adinkra into geometry lessons	Poster Session 3	P3-41	Kennedy Damoah

The role of early temperament in predicting academic and social behaviors in elementary school	Poster Session 1	P1-29	Kevin Hwang
Infants' inferences of relationship from helping	Poster Session 2	P2-112	Kexin Jiang
Testing linguistic transparency and morphological bootstrapping in early numerical development: A cross-linguistic comparison of Chinese and English	Poster Session 2	P2-63	Keying Wang
Children's beliefs about their own and adults' sense of belonging in STEM and non-STEM professions	Poster Session 1	P1-137	Khushboo Patel
The role of family inequality on U.S. and Nigerian children's normative understanding of household labor	Poster Session 4	P4-127	Kiana Gee
Parents support children's processing of negative events	Poster Session 1	P1-36	Kim Roberts
Long-term retention of new words as a function of category-density and vocabulary size in toddlers	Poster Session 2	P2-94	Kimberly Leon
The impact of peer context on the structural complexity of children's narratives	Poster Session 3	P3-92	Kiren Khan
Language dynamics in bilingual book sharing: Readers' language choices and children's vocabulary retention	Poster Session 4	P4-74	Kirsten Read
Predictors of media use and problematic media use in autistic children: The roles of child and parental factors	Poster Session 1	P1-34	Koeun Choi
The role of gesture in narrative memory during early childhood	Poster Session 4	P4-86	Koleen Mccrink
"That's a grown up!" Children's development of the concept of age	Poster Session 1	P1-39	Kosta Boskovic
The optimality of children's cognitive offloading	Poster Session 4	P4-3	Kristy Armitage
Seasonal word learning: Weather and climate shape vocabulary acquisition in monolingual and bilingual infants	Poster Session 4	P4-70	Laia Fibla
From essentialism to epistemic agency: How social literacy emerges through children's interactions with ELA/text and representations	Poster Session 3	P3-151	Laronnda Thompson
"Because after that [death] nothing else happens in her life": Exploring the link between future-oriented cognition and children's understanding of death's irreversibility	Poster Session 3	P3-105	Laura Găini
Validation of a novel social exploration task	Poster Session 2	P2-23	Laura Jett
Stakes reduce children's optimism about their abilities	Poster Session 2	P2-142	Laura Reyes Umaña

An expanded framework for investigating children’s intuitive theory of belief	Poster Session 2	P2-113	Laura Soter
Children’s intuitions about digital privacy	Poster Session 4	P4-110	Lauren Girouard
Age-related differences in using gesture to predict social affiliation	Poster Session 3	P3-97	Lauren Howard
Marking up maps: How drawing enhances middle school students’ engagement with spatial data	Poster Session 2	P2-107	Lauren Pagano Hush
From field trip to family talk: parent–child reflection on an informal STEM learning experience	Poster Session 3	P3-78	Lauren Smith
Quality over quantity: The home language environment as an efficient path to word learning	Poster Session 4	P4-69	Layla Unger
How social norms shape children’s environmental concern	Poster Session 1	P1-124	Lesenia Fish
Relations between flexible attention to magnitudes and early mathematical skills	Poster Session 3	P3-56	Leslie Duru
Infants’ and dogs’ perception of causality in launching events	Poster Session 3	P3-39	Leslie-Ann Eickhoff
Strategic cheating in young children: The role of adult observability in moral decision-making	Poster Session 1	P1-115	Li Zhao
Cognitive load influences tool use: Children’s eye–hand coordination with chopsticks	Poster Session 1	P1-21	Liangchi Chen
Similarity informs children’s curiosity and prosocial behavior	Poster Session 4	P4-132	Lily Gosar
Have I seen this story before? Multiple indices of event memory in childhood	Poster Session 1	P1-7	Lily Steele
Pretend play as science role models: Exploring behavioral and psychological impacts	Poster Session 3	P3-142	Lin Bian
We are all multilingual: Children’s visual representations of their linguistic repertoires reveal early awareness of dialect, style-switching, and identity	Poster Session 4	P4-98	Linfei Yang
From plate to planet: Exploring children’s knowledge of food and environmental awareness	Poster Session 4	P4-108	Litong (Bella) Zhang
Executive functioning, but not theory of mind, predicts persistent cheating longitudinally	Poster Session 3	P3-121	Liyuzhi Dong
How Marin made number	Poster Session 1	P1-51	Liza Kahwaji
Children’s reasoning about the utility of anger	Poster Session 3	P3-113	Luis De La Vina

Exploring the influence of caregivers' object category selection on children's word learning	Poster Session 4	P4-88	Lynna Tran
Early animacy perception predicts later autism development	Poster Session 2	P2-13	M.D. Rutherford
Five- to 9-year-old children's body type judgments	Poster Session 3	P3-149	Madalyn Prince
Exploring social biases in children's evaluation of statements and faces	Poster Session 1	P1-163	Madeleine Garza
Using fNIRS to assess children's frontal connectivity while viewing digital media	Poster Session 2	P2-19	Madeline Davis-Troller
Children and adult's reasoning about the traits of targets of anti-social and prosocial behavior	Poster Session 1	P1-128	Madeline Ephraim
Step-by-step or all-at-once: Preference for insight problem solving across goals and age groups	Poster Session 3	P3-143	Madeline Klotz
Modal reasoning in three-year-olds prior to the acquisition of modal language	Poster Session 4	P4-46	Madeline Meade
If moms do it, it can't be that important: Children's reasoning about gender disparities in domestic work	Poster Session 2	P2-153	Madison Kirby
Individual differences in the development of possibility understanding are not associated with engagement in pretend play	Poster Session 2	P2-49	Madison Riley
Patterns and predictors of 4th graders' work shown when solving word problems	Poster Session 1	P1-16	Maegan Colbert
Who reads the story matters: The impact of AI on preschoolers' learning during parent-child shared e-book reading	Poster Session 3	P3-61	Mahmut Sami Gurdal
Children's representation of topological structure revealed through drawing	Poster Session 3	P3-1	Mahwish Kittur
Recursive statistical learning in adults, children, and monkeys	Poster Session 2	P2-93	Maimoona Abdaal
Using magnitude to find order: Cardinal cues in symbolic and non-symbolic sequence processing	Poster Session 2	P2-2	Maria Clara Brandao
Parents' motivational beliefs predict autonomy-supportive behaviors during spatial play	Poster Session 2	P2-69	Mariana Sosa Ferri
Children adjust inferences about social groups in response to sampling skew	Poster Session 4	P4-42	Marianna Zhang

Children's integration of verbal and emotional cues to make communicative inferences	Poster Session 2	P2-88	Marija Bolic
Disrupting the default? Testing the limits of children's selective preference for generalizable information transmission	Poster Session 2	P2-104	Marina Bazhydai
Children's and adolescents' reasoning about peers' likelihood of confronting gender bias in a science context	Poster Session 4	P4-122	Marley Forbes
Victims in the eyes of others: Morality and agency through the eyes of preschoolers and adults	Poster Session 1	P1-113	Martyna Rogowska
"We need two eggs for this recipe": The role of recipe affordances and individual factors in parent-child number talk when cooking together at home	Poster Session 4	P4-59	Mary Depascale
Physical cognition in altered gravity: Variable motor experience improves children's reasoning	Poster Session 2	P2-101	Maryam Haq
Mapping school-age curiosity: Taxonomy, tasks, and preliminary findings	Poster Session 3	P3-16	Mathilde Prenevost
Comparing attitudes toward diverse and homogeneous groups characterized by race, accent, and sex/gender among Canadian primary-school-aged children	Poster Session 1	P1-89	Maura Whitman
Beyond a label: A conceptual model of autistic gender understanding and identity formation	Poster Session 4	P4-154	Maximillian Soares Miehlsstein
Are objects easier than pictures for vocabulary assessment with 3-5 year old children?	Poster Session 1	P1-93	Maya Martinez-Krams
Developing critical thinking in the preschool years: An exploratory survey of parents' views and practices	Poster Session 4	P4-142	Maya Egerton-Graham
Do children evaluate potential teachers based on their social connections with their parent?	Poster Session 4	P4-165	Maya Hernandez
Infants' multimodal requests and protests and mothers' responses during everyday interactions	Poster Session 4	P4-100	Maya Kittles
The role of timing and modality of language exposure in executive function among deaf and hard of hearing children	Poster Session 2	P2-27	Maya Rosen
Moral of the story: Anthropomorphism has no effect on older children's moral learning from storybooks	Poster Session 2	P2-118	Maya Vemulapalli
To look or to trust? Social context and information-seeking in chimpanzees	Poster Session 4	P4-15	Mayte Martinez

Following the cue: Covert spatial orienting in infants with Neonatal Abstinence Syndrome and typically developing infants	Poster Session 4	P4-29	Mckenzie Sheets
The influence of feedback verification and feedback personalization on children's accuracy & resilience during mathematics problem solving	Poster Session 3	P3-63	Megan Merrick
Representations of social mobility shift children's evaluations of wealth inequality	Poster Session 4	P4-131	Megan Norris
Children's inferences about disclosing emotions across relationships	Poster Session 1	P1-152	Megan Richardson
Testing the boundaries of the hypercorrection effect: Metacognitive monitoring and analogical reasoning in adults and elementary-school children	Poster Session 1	P1-15	Megan Waller
How does language bias memory for gender stereotypes?	Poster Session 4	P4-76	Meghan Kalvey
Why wait? A meta-analysis of the marshmallow test	Poster Session 4	P4-1	Mehmood Shajih
Understanding family participation in online developmental research	Poster Session 1	P1-49	Melissa Kline Struhl
Representational insight and scale similarity: Evidence from meta-analysis	Poster Session 1	P1-83	Mengguo Jing
Family media practices linked to problematic media use in early childhood	Poster Session 3	P3-21	Meryem Seyda Ozcan
From melody to meaning: Song and early word learning in infancy	Poster Session 1	P1-99	Meyha Chhatwal
Mothers' and fathers' spatial talk in low-income families: Links to preschool spatial and numeracy skills and gender differences	Poster Session 4	P4-52	Miaofan Chen
Learning inequality at home: The reproduction of unequal household labor	Poster Session 4	P4-135	Miaomiao Zhang
Can we measure visual short-term memory capacity in infants? Investigating possible candidates for capacity through passive looking measures	Poster Session 1	P1-30	Micalee Segers
Instruction on children's exploration and effort	Poster Session 4	P4-147	Michael Tomasello

An Item Response Theory (IRT) framework for modeling individual differences in children's non-symbolic numerical comparison	Poster Session 3	P3-55	Michaela Haig
Math language and print awareness as predictors of preschool numeracy skills	Poster Session 2	P2-97	Michelle Luna
Coherence in counterfactual reasoning and related constructs	Poster Session 3	P3-47	Michelle Wong
Caregivers' beliefs about play and engagement in guided play behaviors in a children's museum	Poster Session 3	P3-145	Mikka Hoffman
Exploring math curiosity in Chinese elementary students	Poster Session 2	P2-144	Mingxi Han
Language mixing hinders novel word learning in 3-4-year-old Korean-English bilingual learners	Poster Session 2	P2-84	Minjeong Kang
Children and adults' use of experience-driven prior knowledge in number discrimination	Poster Session 1	P1-52	Miranda Long
Social curiosity in infancy: Insights from a longitudinal curiosity battery	Poster Session 4	P4-149	Miranda Salinas
The development of children's spontaneous episodic future thinking	Poster Session 2	P2-9	Mirella Rocca
Technology exposure and performance in early childhood tablet-based assessment: Findings from the NIH Infant and Toddler Toolbox norming study	Poster Session 4	P4-23	Miriam Novack
How infant looking patterns to trivalent events change from object to person interaction	Poster Session 1	P1-26	Mischa Gushiken
Mechanisms of belief formation and rejection in learning from testimony	Poster Session 1	P1-22	Mohit Mukherji
Talking brilliance: Parents' role in transmitting brilliance beliefs about STEM	Poster Session 1	P1-168	Molly Tallberg
Dimensions of parental responsiveness and child language development	Poster Session 4	P4-92	Molly Willis
Prenatal cortisol exposure timing and early infant problem solving skills	Poster Session 2	P2-15	Monet Ruiz
The development of procedural choice in contexts of resource scarcity	Poster Session 2	P2-119	Montana Shore
A pig as small as a cup? Children's beliefs about improbable natural items	Poster Session 4	P4-45	Mopreet Pabla

The impact of embodiment on children’s understanding of conceptual compositionality	Poster Session 1	P1-65	Muyuan Xu
Quality over quantity: How children’s contact with peers with disabilities relates to inclusive behavior	Poster Session 1	P1-133	Myeong Won Kim
Gesture and cognitive load: Does experimenter-encouraged gesture benefit all children?	Poster Session 1	P1-33	Myla Vera
Inferring social relationships from vicarious emotions	Poster Session 3	P3-132	Naomi Batarse
Children's recommendations for prosocial, selfish, and incompetent excuses following a social transgression	Poster Session 2	P2-115	Naomi Holtzman
Children’s math learning opportunities in after-school programs: Staff perspectives from boys & girls clubs	Poster Session 4	P4-140	Nasrin Shaaban
Selective storytime: Confirmation bias in children’s interactions with others’ anecdotal accounts	Poster Session 2	P2-105	Natalie Demario
Children’s intellectual humility and their persistence after a challenge	Poster Session 2	P2-146	Natalie Hutchins
Parents adjust their explanations to science questions based on their perceptions of difficulty	Poster Session 1	P1-47	Natalie Quintero
Learning verbs: Can children extract a repeated event within complex scenes?	Poster Session 1	P1-86	Natalie Rangel
Children’s emotion attributions about intergroup exclusion and relationships to moral evaluations	Poster Session 3	P3-127	Nathaniel Pearl
Failure to replicate fear bias in a large sample of 5- to 7-month-old infants tested after covid-19	Poster Session 2	P2-31	Neslihan Oguz
The relationship between residential mobility, group membership, and children’s testimonial learning decisions	Poster Session 3	P3-140	Nghi Nguyen
Making learning stick: Examining how card games can promote biological and relational reasoning	Poster Session 1	P1-102	Nicholas Swanger
The influence of shape bias on children’s social cognition increases with age	Poster Session 2	P2-108	Nicholaus Noles
Mapping the social world: How group status perceptions selectively shape own-race bias in dominant-group children	Poster Session 4	P4-130	Nicole Alarcon
Knowledge acquisition in popular race-related children’s books: A content analysis	Poster Session 2	P2-167	Nicole Huth

Relating changes in children’s descriptions and line drawings of visual concepts across childhood	Poster Session 1	P1-110	Nicole Sahrling
Mastering the basics: How focused caregiver input shapes early emotion category boundaries	Poster Session 1	P1-94	Nikhita Prabhu
Better together: Long-term spatial skills intervention in preschool using puzzles	Poster Session 2	P2-52	Nina Peleg
Navigating abstract semantic domains in a multilingual environment	Poster Session 4	P4-72	Nina Schoener
Children consider gossipers’ conflicting intent when making epistemic decisions	Poster Session 2	P2-136	Nina Ye
Does executive functioning mediate the effect of language in deaf and hard of hearing children's number learning?	Poster Session 3	P3-37	Nirvaan Mehta
Press play: Creating a video-based method to measure the home toy environment	Poster Session 3	P3-83	Nithiya Shree Uppara
Real-time language processing and the brain: Structural contributions of the dorsal language pathway	Poster Session 3	P3-98	Noah Scott
Characterizing culture in early language development: The role of family structure and community characteristics	Poster Session 1	P1-85	Noemi Garcia Rodriguez
“Can trees talk?”: Naive theories behind children’s questions	Poster Session 1	P1-78	Nora Chen
Investigating the role of social contact on infants' moral character inferences	Poster Session 1	P1-125	Norman Zeng
Children’s selective learning: Exploring children trust in explanation about social inequality and the role of social status	Poster Session 3	P3-148	Norwood Glaspie
Development of perspective-taking: Faultless disagreement about generic meanings	Poster Session 2	P2-72	Ny Vasil
Affective linguistic alignment during play and young children's math skills	Poster Session 4	P4-82	Olapeju Bobbett
The development of beliefs about pretend possibilities	Poster Session 3	P3-48	Olivia Shyiak
Prosocial behavior and general psychopathology in youth with ADHD: Gender differences in longitudinal associations	Poster Session 4	P4-22	Oluwatoni Ikhile
The effect of survival-relevant knowledge on reasoning about biological variability: a developmental comparison	Poster Session 3	P3-102	Olympia Mathiapparanam
Cues of prosocial behavior reduce children’s anti-atheist bias	Poster Session 3	P3-133	Oya Serbest

Breakthrough messaging relates children's engagement and parent-child interaction in a gear exploration task	Poster Session 4	P4-144	Paola Alvarado
Examining children's and adult's attitudes and associations toward children who differ by race and wealth	Poster Session 3	P3-167	Patricia Colaco
Do executive function interventions generalize across measurement approaches? A meta-analysis of questionnaire-based outcomes in childhood	Poster Session 1	P1-11	Paulo Laurence
The link between self-regulation, child homelessness, and individual differences in intrinsic learning motivation	Poster Session 2	P2-147	Penelope Warm
Crusaders for change: Serious game play changes middle schooler's beliefs about disability	Poster Session 3	P3-154	Perri Funai
Disjunctive syllogism in 2½-, 3½-, 4½-, and 5½-year-old children	Poster Session 4	P4-57	Peter Krøjgaard
Young children are curious about what others think about them	Poster Session 4	P4-126	Peter Zhu
Relational language and learning in a card game about the life cycle	Poster Session 3	P3-111	Phoebe Miller
Climbing the ladder: What do children in the United States think causes upward mobility?	Poster Session 2	P2-123	Pinar Aldan
Investigation of the impact of classroom level factors on students' off-task behaviors	Poster Session 1	P1-4	Praveen Kumaravelan
Emotion regulation skills and their importance in academic achievement	Poster Session 4	P4-145	Preeti Bachu
Is approaches to learning part of self-regulation? Longitudinal evidence from kindergarten to fifth grade	Poster Session 4	P4-2	Qianjin Guo
Will I look bad for asking a question?	Poster Session 2	P2-143	Qianqian Chen
Spontaneous episodic future thinking in 5-7-year-old children	Poster Session 4	P4-41	Que Anh Pham
The effects of social disadvantage on children's emotions and motivation	Poster Session 2	P2-165	Rachael Silberstein
Decomposing the simplification effect: Educators robustly simplify speech to infant vocalizations across multiple speech qualities	Poster Session 3	P3-70	Rachel Albert

To wait or not to wait? Validating a computerized delay choice paradigm to measure children's waiting behavior and cognitive effort	Poster Session 3	P3-35	Rachel Foster
The developmental origins of socioeconomic inequality and mobility (mis)perceptions	Poster Session 4	P4-166	Rachel King
Children's and adults' trust in AI and humans for factual questions and moral dilemmas	Poster Session 4	P4-148	Rachel Severson
Children's trust in technology across contexts	Poster Session 2	P2-122	Rebeca Urizar
Developmental changes in children's production of line drawings in a picture-sparse environment: Evidence from Kisumu, Kenya	Poster Session 1	P1-91	Rebecca Zhu
Children's expectations of dominant and prestigious leaders	Poster Session 4	P4-163	Renée Creppy
Developmental changes in object exploration over the transition from crawling to walking	Poster Session 4	P4-32	Renwen Zhang
Parents' underestimation of young children's abilities limits their autonomy	Poster Session 3	P3-139	Reut Shachnai
A computational account of Quinian bootstrapping as analogy-based programming language synthesis	Poster Session 1	P1-69	Ria Das
The impact of language proficiency on cross-language activation in bilingual children: An EEG study	Poster Session 4	P4-91	Richard Kruk
Story-based tinkering programs as engendering both a sense of belonging and spatial thinking in museums	Poster Session 1	P1-140	Riley George
Investigating children's temporal memory accuracy for autobiographical events: Implications for forensic settings and theoretical models of episodic memory	Poster Session 4	P4-28	Riya Trikha
How children make moral exceptions about helping and fairness	Poster Session 1	P1-120	Rob Ethan Santiago
Early nonsymbolic proportional estimation strategies and their contributions to math achievement	Poster Session 1	P1-64	Roberto Abreu-Mendoza
Architecture as a social signal: Protective architectural elements shape children's and adults' perception of group behaviors, traits, mental states, and structure	Poster Session 3	P3-155	Rodney Tompkins
Predicting children's prosociality from cultural values: Evidence from Latino families	Poster Session 4	P4-117	Rodolfo Cortes Barragan

Can young children represent mere possibilities? Probing comprehension of “if” and “when” with task persistence	Poster Session 1	P1-41	Roman Feiman
When representation changes: Children’s inferences about competence and fairness after policy interventions	Poster Session 4	P4-123	Rongzhi Liu
Representations of social dominance based on size in rhesus monkeys (Macaca mulatta)	Poster Session 2	P2-160	Rosa Muñoz
Analogical transfer between block- and text-based programming languages	Poster Session 4	P4-67	Rosalind Owen
Pragmatic inference from praise: Do children interpret individuated effort praise as a signal of lower ability?	Poster Session 1	P1-88	Rose Reagan
Vocabulary depth as a predictor for naturalistic word-learning	Poster Session 4	P4-87	Rowan Levick
Pretend play elicits more caregiver speech than building play	Poster Session 3	P3-89	Ruby Trujillo
Pathways from caregiver language-building behaviors and infant intersensory matching of faces and voices to child language outcomes	Poster Session 4	P4-34	Ryan Cannistraci
Gettier intuitions across development: Evidence for factive theory of mind in children and adults	Poster Session 4	P4-119	Saba Amirhaftehran
Causal understanding in chimpanzees and children	Poster Session 4	P4-38	Sabana Gonzalez
‘Et tu, Brute?’ How young children reason about betrayal toward in-group versus out-group members	Poster Session 4	P4-129	Sadie Ferguson
Showing, but not telling, children that inequalities are unfair impacts children's reasoning	Poster Session 3	P3-152	Sadie Levy
Valuing humility: Children’s evaluations of uncertain reasoners across moral and scientific domains	Poster Session 2	P2-126	Sahana Iyer
Relational reasoning in middle childhood	Poster Session 1	P1-68	Sahana Sridhar
Is it better not to know?: Adults’ and children’s understanding of how uncertainty affects emotion over time	Poster Session 1	P1-48	Sahej Gulati
Children’s inferences of normality from causal explanations	Poster Session 2	P2-47	Salih Ozdemir
Explanation evaluation and generation in infancy	Poster Session 4	P4-107	Sally Berson
Parent-child interaction facilitates children’s scientific reasoning	Poster Session 2	P2-41	Sam Mchugh
Not "born that way": Essentialism and homophobia in childhood	Poster Session 1	P1-154	Sam Vandyck

What happens after we die?: Children's spontaneous questions about death	Poster Session 1	P1-104	Samantha Bauer
Caregivers scaffold children's causal learning with inconsistent evidence	Poster Session 1	P1-46	Samantha Basch
Do infants show early neural biases in processing same-race and other-race people?	Poster Session 2	P2-21	Samantha Fong
Children use emotions to flexibly learn social norms	Poster Session 2	P2-134	Samantha Reisman
Infant-directed singing improves long-term infant mood: Three randomized trials with ecological momentary assessment	Poster Session 3	P3-73	Samuel Mehr
Children's evaluation of self-denying leaders	Poster Session 3	P3-125	Sara Al-Uqaili
The simplification effect replicates beyond dyads: Infant vocalizations elicit simplified responses from educators in infant-toddler classrooms	Poster Session 1	P1-81	Sara Dintiman
Effects of pairing feedback with the opportunity to revise on middle schoolers' fraction arithmetic performance	Poster Session 4	P4-14	Sarah Clerjuste
Physiological measures of attention to speech: Validating HRV as an index of observational learning.	Poster Session 3	P3-38	Sarah Goodman
Fostering STEM engagement in spatial thinking from parent-child interaction: A remote study	Poster Session 3	P3-138	Sarah Kiefer
Speaker gender matters more than statistics in toddlers' word learning	Poster Session 1	P1-98	Sarah Marks
The influence of parental code-switching frequency on young bilingual children's early memory retrieval and generalization abilities	Poster Session 3	P3-20	Sarah Muller
"Take the picture?": Children's awareness of when private images should be protected	Poster Session 3	P3-108	Sarah Petriw
Bilingual word learning under uncertainty in children and adults	Poster Session 4	P4-31	Sarah Rajendra
Heterogeneity in emergent bilinguals: Linking child language profiles to parent home language support and child self-regulation	Poster Session 1	P1-72	Sarah Surrain
False belief understanding influences children's incentivized mentalizing and fantasy understanding	Poster Session 1	P1-118	Sarah Sweezy

Investigating the effects of making promises on young children's sense of commitment	Poster Session 1	P1-116	Sarah Williams
Moral self-concept and affective forecasting: Pathways to prosocial behavior in girls and boys	Poster Session 3	P3-118	Seleste Beaulieu
Theory of mind predicts quality but not quantity of adolescents' online interaction	Poster Session 3	P3-130	Sepideh Yasiniyan
Moral concern for animals across development: Evidence from Türkiye and the UK	Poster Session 2	P2-164	Serengeti Ayhan
Rethinking computational thinking as discrete skills: Evidence from an empirical test of a four-component CT model	Poster Session 1	P1-61	Serkan Ozel
Spontaneously curious: An examination of cues for children's future-oriented information seeking	Poster Session 3	P3-43	Setenay Evsen
The role of early patterning knowledge in predicting math learning in a base-10 board game	Poster Session 1	P1-57	Shakira Abdul-Rauf
When should you forgive? Children's judgments of victim's responses to transgressors' choices	Poster Session 4	P4-39	Shalini Gautam
Before continuing on, count back -- the role of counting in explaining kindergarteners' place value knowledge	Poster Session 1	P1-55	Shang Li
The anxious mind and its relationship to social cognitive abilities in children.	Poster Session 1	P1-3	Shannon May Craig
Do early spatial skills matter? Evidence for associations with long-term mathematics attainment	Poster Session 4	P4-53	Shannon Rosbotham
Maternal input and early math language in bilingual toddlers	Poster Session 4	P4-66	Shanttell Fernandez
A cross-cultural examination of children's judgements of language-based social exclusion	Poster Session 2	P2-158	Sharanya Bashyam
Do infants generalize "mommy" to other women and "daddy" to other men?	Poster Session 1	P1-160	Shi Xin Ooi
Japanese children trust the loser: The development of selective trust based on conflict outcomes	Poster Session 3	P3-159	Shinnosuuke Ikeda
Development of visuospatial attention as a function of cue validity and birth mode	Poster Session 1	P1-24	Shir Bach-Kay
Interest or rewards? Children's reasoning about intrinsic and extrinsic motivation across task contexts	Poster Session 2	P2-138	Shixing Yuan

One skill, different journeys? Morphological awareness and reading growth across socioeconomic status	Poster Session 3	P3-96	Shuqi Yu
Children's sensitivity to advantage: Leverage in bargaining contexts	Poster Session 1	P1-122	Sifana Sohail
Socialization of reality-based imagination during parent-child pretend play	Poster Session 2	P2-43	Sining Tao
Building explanations: How children coordinate causal understanding with theory of mind	Poster Session 3	P3-45	Siyang Zhang
Young children's evaluations of gender conforming and nonconforming peers	Poster Session 3	P3-156	Sofia Briones
What does it take for infants to imitate actions on objects? An investigation of joint attention, intentional understanding, and deferred imitation in the first year of life	Poster Session 1	P1-143	Sofie Beyer
Gender, science capital, and parent-child conversation during an outdoor science storybook activity	Poster Session 3	P3-146	Sona Kumar
Examining natural polyseme learning: Mixed evidence for a polyseme learning advantage	Poster Session 3	P3-87	Sonia Singh
Interaction between gender and artificial intelligence biases on numerical estimation and social perception	Poster Session 4	P4-164	Sophia Carter
Are sports for boys? Gender stereotypes about sports in children ages 5-7	Poster Session 1	P1-157	Sophia Liles
Greater attention to same-race faces and lack of exposure to racial diversity in infancy predict choices to play with same-race peers in preschool	Poster Session 1	P1-155	Sophie Arnold
Understanding the social and causal components of observational memory	Poster Session 2	P2-29	Sophie Nagarajan
How do perceived moral and causal responsibility shape children's voting behaviors?	Poster Session 4	P4-156	Sophie Varela
Family visits to a dinosaur exhibit: Variables that impact children's science interest	Poster Session 3	P3-144	Stacey Hoffmeister
Exploring the limits of blame: Adults but not children extend blame by association	Poster Session 4	P4-116	Stanka Fitneva
Word-referent mapping in bilingual toddlers and the role of sociocultural influences	Poster Session 2	P2-70	Stephanie Castro

Examining the effectiveness of encoding techniques in 6- to 8-year-old children	Poster Session 4	P4-30	Stephanie Denison
Geo-owl academy: Investigating the development of large-scale spatial skills in late childhood and early adolescence	Poster Session 4	P4-55	Stephanie Doner
Laughter as a signal in naturalistic word learning	Poster Session 2	P2-11	Steven Elmlinger
Investigations of the analog magnitude system and vocabulary on number word comprehension	Poster Session 3	P3-62	Steven Yu
It's mommy's turn: Why do parents refer to themselves in the third person?	Poster Session 2	P2-77	Sudha Arunachalam
Age-based prediction in children's language processing	Poster Session 3	P3-86	Suevin Un
Parents calibrate taking over based on task difficulty and children's competence	Poster Session 1	P1-147	Surya Marimuthu
Preschoolers are more like adults than like pigeons: 4-year-old's performance on the RMTS task	Poster Session 1	P1-54	Susan Hespos
There are many paths to failure but fewer paths to success: evidence from relational reasoning tasks on preschoolers	Poster Session 3	P3-52	Susan Hespos
Enhancing young children's learning from multisensory lessons via attention to relevant context	Poster Session 3	P3-13	Svetha Mohan
Hidden communication: A machine learning approach to analyzing caregiver-infant contingency in babywearing contexts	Poster Session 2	P2-73	Sydney Segal
Modeling how semantic similarity and vocabulary size interact in early lexical development	Poster Session 1	P1-74	Sylvia Ee
Norms and hierarchies: How children's sharing in Brazil and Canada develops to adjust to their social world	Poster Session 3	P3-116	Sylvia Pinheiro
Finding theory in the classroom: Validating a teacher-led numeracy screener using classical effects from numerical cognition	Poster Session 1	P1-67	Taeko Bourque
Who drew this? The development of visual style perception	Poster Session 2	P2-39	Tal Boger
Gender stereotypes, egalitarian beliefs, and academic achievement in early childhood	Poster Session 4	P4-160	Talia Halleck
The impact of assigned group status on children's beliefs and attitudes about past structural inequality	Poster Session 2	P2-150	Tania Dhaliwal

Maternal thiamine supplementation protects responsive eye/face region gazing in breastfed infants at risk of thiamine deficiency	Poster Session 3	P3-25	Tapley Sorenson
A cross-cultural comparison of reciprocal sharing and its cognitive prerequisites in a longitudinal study of children from Canada and India	Poster Session 1	P1-127	Tara Callaghan
How sure are you that this happened when you were 5 years old? Examining confidence for temporal memory judgements across childhood and adolescence	Poster Session 2	P2-34	Tarnpreet Virk
Examining the precision of infants' visual concepts by leveraging vision-language models and automated gaze coding	Poster Session 2	P2-109	Tarun Sepuri
I won the raffle!: Children's perceptions of luck and chance	Poster Session 3	P3-42	Taryn Crone
Describing characteristics of early expressive vocabularies: Comparing late talkers and typically-developing English-learning infants	Poster Session 3	P3-74	Taylor Shackelford
The role of worked examples in supporting early math learning	Poster Session 2	P2-58	Taylor Stone
Social rank judgments in childhood: The role of wealth and traits	Poster Session 2	P2-156	Taylor Wood
An exploration of parent-child joint attention during a problem-solving task: A novel eye tracking method	Poster Session 1	P1-19	Thuvaraka Mahenthiran
More than control: Exclusivity drives children's ownership inferences	Poster Session 3	P3-129	Tia Kleiner
U.S. Children's anti-Asian biases in the context of the COVID-19 pandemic	Poster Session 2	P2-157	Tim (Wei-Ting) Chao
Children's moral judgements of sharing (mis)information online	Poster Session 3	P3-134	Tj Jones
The relation between pretend play and executive functions in early childhood: A systematic and meta-analytic review	Poster Session 2	P2-1	Tobias Constien
Getting the proper grip: A longitudinal study of how infants learn to adapt action plans	Poster Session 1	P1-1	Tommaso Ghilardi
"It's always the same pattern": Promoting abstract thinking with symbolic labels in pattern practice	Poster Session 2	P2-51	Tongyao Zhang

A deeper look at individual differences of looking behaviors of infants during habituation task	Poster Session 2	P2-28	Tori Jones
Toddlers' pointing comprehension with head-mounted eye tracking	Poster Session 2	P2-98	Tovi Portnow
Going to the source: Preschoolers' own narratives illuminate emotion concept development	Poster Session 4	P4-8	Travis Stackow
Young children's sudden talk about the past: A double case study of two young girls' spontaneous memories across a seven-month period	Poster Session 3	P3-11	Trine Sonne
Metacognition and flexible cognitive control: A developmental study	Poster Session 2	P2-14	Tripti Verma
Understanding the mind-gaze link: Gaze-based measures of mind-wandering in children during executive functioning tasks	Poster Session 4	P4-11	Tyler Birse
Restless sleep associations with control and default-mode network activation in youths during an inhibition task	Poster Session 2	P2-25	Tyler Larginho
Willingness to engage executive function and links with academic outcomes in children	Poster Session 4	P4-37	Tzu-Ching Lin
Who looks nice: Novel methodology to visualize children's mental representations of prosociality	Poster Session 4	P4-157	Uliana Solovieva
Ethnicity, music, and language: The impact of cultural cues on infant phonetic discrimination	Poster Session 4	P4-78	Vaidehi Asawa
Bullies aren't all bad: Children's use of contextual information in evaluating the true selves of physically and relationally aggressive peers	Poster Session 4	P4-118	Valerie Umscheid
Developmental cascades in early mental rotation: A longitudinal study of mental rotation in 2- to 4-year-old children	Poster Session 2	P2-65	Van Pham
Exploring variations in families' ecological reasoning about regionally familiar and unfamiliar animals	Poster Session 4	P4-106	Vera Umansky
The probability of probably: The impact of probability on 2- to 4-year-olds' second-order correlation learning	Poster Session 1	P1-45	Veronica Hearne
Put that where it belongs: Children and adults organize objects based on versatility	Poster Session 4	P4-112	Victoria Goosen

Children produce richer language when talking about high interest topics	Poster Session 4	P4-94	Victoria Hennessy
How do children evaluate and reason about residential segregation? Evidence from Hindu and Muslim children in India	Poster Session 4	P4-153	Victoria Keating
Parents' moral concern and political ideology in children's moral concern: Evidence of socialization in shaping the development of moral expansion	Poster Session 2	P2-132	Virginia Cano
Upside-down: A novel exploration of children's misunderstanding of the balance-scale task	Poster Session 1	P1-56	Virginie M L Filion
Bilingual classrooms in practice: Prevalence and predictive power of core multilingual teaching strategies	Poster Session 2	P2-33	Vivian Paiz
How parental education shapes children's cheating behaviour: The mediating role of verbal iq	Poster Session 4	P4-124	Wenjin Sun
Linking parental math anxiety and children's math achievement: The role of homework help and socio-economic status	Poster Session 4	P4-51	Wenke Möhring
Strategic questioning in parent-child interaction: Sensitivity to children's knowledge and real-time responses	Poster Session 4	P4-81	Wenyan Feng
Why do they fail or succeed? Children's reasoning of success and failure of individuals from different socioeconomic backgrounds	Poster Session 1	P1-138	Wenzhuo Zhang
A longitudinal test of PAR theory	Poster Session 1	P1-135	William Fabricius
All your feelings are okay: The role of gentle parenting in children's emotion regulation	Poster Session 1	P1-117	Willow Vince
Children and adults' categorical generalization of second-order relations in causal launching and reasoning contexts	Poster Session 3	P3-46	Wonjoon Choi
Math anxiety and working memory in symbolic and nonsymbolic fraction performance across grades 7-9	Poster Session 3	P3-60	Xiang Cheng
Continuous measures of bilingualism predict memory generalization in early childhood	Poster Session 1	P1-9	Xiaoqiao Wang
Rich but unsatisfied: Development of children's reasoning and evaluations of material vs. Psychological wealth	Poster Session 1	P1-121	Xin (Alice) Zhao

Measuring flexible attention to magnitude skill in young children	Poster Session 2	P2-16	Xinhe Zhang
Children's understanding of common ground in relationships	Poster Session 2	P2-111	Xirou Cheng
Early adaptive functioning predicts later restricted behavioral patterns within children with familial history of autism	Poster Session 4	P4-18	Xueqi Ao
Against omission bias: Adolescents prefer commissions in vaccination decision-making	Poster Session 3	P3-117	Yanwei Wang
Structured procedural practice can lead to conceptual learning in mathematics	Poster Session 4	P4-49	Yao Xiao
Information dynamics: Children's understanding of how knowledge changes over time	Poster Session 3	P3-15	Yashika Berry
Infants' attention to refusal to help across instrumental and comfort contexts	Poster Session 3	P3-136	Yeon Ju Suh
With training, 21-month-olds rapidly learn to from precise representations of sets of four items	Poster Session 1	P1-53	Yi Lin
When labels don't help: How labeling shapes children's memory for object features	Poster Session 4	P4-104	Yi Tong
Racial stereotypes about brilliance start early and discourage Black children's interests	Poster Session 2	P2-151	Yihan Qian
Children learn gender stereotypes from biased gestures	Poster Session 4	P4-84	Yihan Qian
Parenting behaviors during spatial toy play and spatial skills in 4- and 5-year-olds	Poster Session 2	P2-128	Yinbo Wu
Valuing the process or the outcome? How messages about the value of effort influence children's persistence	Poster Session 2	P2-137	Ying Hu
Young children use conversational timing as a cue for prosocial commitment	Poster Session 2	P2-71	Yingjia Wan
A progressive cognitive bias modification intervention for subclinical depressed adolescents: A randomized controlled trial	Poster Session 2	P2-4	Yining Wang
Self-explanation actively recruits comparison in children	Poster Session 2	P2-62	Yinyuan Zheng
The role of tally systems in preschoolers' creating representations of large exact numbers: A case study of the number five	Poster Session 2	P2-60	Yiqiao Wang

Learning novel words from child vs. adult speech: The impact of peer speech exposure	Poster Session 4	P4-95	Yiqun Zhang
How do children learn when to trust others? The effects of expectations and experience economic trust	Poster Session 1	P1-167	Yiyan Wang
Where is the “shokalata”? The role of cognates in children’s use of emotional prosody to infer referential intent	Poster Session 3	P3-82	Yomna Waly
The more, the better? Children’s expectations of happiness as a function of resource quantity and quality	Poster Session 4	P4-168	Youjung Choi
The cost of being unresponsive: Blunted moral impression updating forecasts poor psychosocial adjustment in adolescents	Poster Session 2	P2-117	Youran Zhang
The development and consequences of geographical stereotypes about status among Chinese children: the role of contact with rural population	Poster Session 3	P3-104	Yuchen Tian
Development of meta-motivational knowledge: 4- to 9-year-olds’ awareness of cognitive reframing in shaping motivation	Poster Session 4	P4-113	Yuebin Zhao
Good-enough vision at birth: A computational demonstration of what newborns can see with rod-dominated, low-acuity input	Poster Session 4	P4-26	Yuxin Li
Preschoolers devalue housework regardless of who performs it	Poster Session 3	P3-158	Yufei Zong
From facilitation to interference: The changing role of object encoding in children’s relational matching	Poster Session 4	P4-58	Yujia Zhang
You should do as shown: Children imitate and defend touchscreen demonstrations, but not TV or live ones	Poster Session 4	P4-138	Yunyi Wu
Brilliance beliefs about math are linked to lower math achievement and motivation in early elementary School	Poster Session 1	P1-142	Yu-Shan (Grace) Huang
Parent-reported noun frequency predicts infants’ online noun comprehension in an eye tracking task	Poster Session 1	P1-90	Yuzhen Dong
Screen use, parent-child interactions, and socioemotional outcomes in preschool children	Poster Session 3	P3-166	Zachary Meyer
Proactive interference in 3-year-old toddlers’ working memory using an eye-tracking task	Poster Session 1	P1-20	Zane Mourad

Can direct observation override gossip? Potential shifts in children's evaluation of gossip targets	Poster Session 3	P3-112	Zehua Wan
The relationship between language and theory of mind in school-age children	Poster Session 2	P2-87	Ziqian Shen
3D Block Test — a new tool for testing 3-5 years old children's 3D mental rotation ability	Poster Session 2	P2-36	Ziyi Li
Force in play: What makes it okay to hit another?	Poster Session 1	P1-130	Zoe Favilla
Affiliation interferes with rational belief revision in early childhood	Poster Session 3	P3-163	Zoe Finiasz
Examining infants' neural sensitivity to fairness	Poster Session 2	P2-135	Zohreh Soleimani
